

PLACE DOOR

Placement Management System

Faculty Guide:
Prof. Amit Sinhal

Problem Statement

The problem statement revolves around the lack of a dedicated platform for placement-related activities in universities, resulting in frustration among students. The absence of a centralized platform leads to challenges such as students missing out on job postings and requirements, having to rely on multiple platforms like Outlook and WhatsApp for updates, and sending generic resumes to all companies.

To address this problem, the solution being proposed by our team is "PlaceDoor," a platform designed to streamline and centralize placement-related activities. PlaceDoor aims to provide a comprehensive platform where companies can post job openings, and students can access and apply for these jobs within the same platform.
